Gracias. Delalain (cont.) XIX. "Le siécle du livre"

His Preface underlines the democratic nature of his enterprise "ouvert à tous" (see footnote and that, unlike most 5, which emphasise that, he is making available major scientific works, he is making available major scientific works, he is making available major scientific works, he is making available major scientific works, he is making available major scientific works, he is making available major scientific works, he is making available major scientific works, he is making available major scientific works, he is making available major scientific works, he is making available major scientific works, he is making available major scientific works, he is making available major scientific works, he is making available major scientific works, he is making available major scientific works, he is making available major scientific works, he is making available major scientific works, he is making available major scientific works), by scholarly rules that ordinary readers can't afford.

Existing libraries are restricted in opening times, and don't allow you to borrow books for reading at home.

The rules (14 articles) are much more elaborate than theirs - spelling and their the system will only work, at these prices, if a spirit of co-operative prevails (eg he specifically discourages joint subscriptions).

Every 4 months, he will publish a Review Bibliographique, with summaries of Review articles. Libraries of non-members, sale prices, free offers etc etc.

Aids (cont.) Curve for Diabetes. Among the aids, Revue Shorthire du SWQ. Ours Riding, Swimming, Sailing, Fencing (but not yet Rugby!). Railway Timetable.
