Ulrichsweb is an effective online tool you can use to determine if an article is peer reviewed.

1. Click Catalogue
2. Type “ulrichsweb” in search box
3. Click “Connect to resource”

Remember to search for the Journal Name! Not the Article title!

The black and white “Referee Jersey” icon means that your article is peer reviewed because the journal it is in is peer reviewed. If you see your journal listed multiple times, it is just different formats, so don’t worry.
