The Map and Data Library is your access to related aggregate data and statistic sources. Many of the most important sources are available on the front page of this website.

To find education-related data and statistics that may not be in these resources you can use the search box or you can click on the Statistics link provided under the Numeric Data section.
After clicking on the Statistics link you will be directed to this page where you can enter ‘education’ in the search bar and click search.

Search results
